

AMENDMENT TO THE ABSTRACT

On new page 11, please insert the following Abstract:

The invention allows an increase in scope of application of a surgical device wherein the operational handpiece is embodied in the form of two parts, one of which includes a handpiece with an injection cannula and the other being a complementary part. The complementary part includes a stabilization handle and can be placed onto the injection cannula in addition to being able to be fixed to the handpiece of the operational handpiece.
